

Judge IT Consulting – Credentials & Services Overview

Independent IT and AI Consultancy Services for UK and European Businesses

JudgeITConsulting.org is led by **Chartered IT Professional Michael Judge (MBCS ID 995123403 | MCP ID 1068069)**, an independent consultant with more than three decades of hands-on experience across the public, private, and voluntary sectors in the UK and Europe.

Michael provides **impartial IT and AI consultancy** that helps organisations assess existing environments, plan sustainable change, and select trusted service partners. His background spans **Microsoft 365, Azure, Intune, Windows and O365 Copilot, cybersecurity, telephony, disaster recovery, RMM and PSA systems, ITIL-aligned service management, and professional printing and scanning support**. He also advises on **AI and Copilot adoption, custom ChatGPT-style assistants, basic website design, and workflow automation**, translating emerging technologies into practical, secure solutions.

Through his professional-body memberships and continuing-professional-development resources, Michael maintains access to specialist research tools, contract-analysis platforms, and software-licensing frameworks. This enables **Judge IT Consulting** to help clients interpret SaaS, IaaS and other service-provider agreements, clarify responsibilities, and ensure value for money while maintaining compliance and governance.

Booking and Scope: A short pre-meeting is held to confirm objectives, scope and preferred collaboration tools (such as Zoom or Microsoft Teams). Full payment is required before the confirmed one-hour consultancy session. Engagements provide advisory guidance only and do not create any ongoing, managed-service or employment relationship. No administrative, security or system credentials are ever created, requested or shared during sessions. Judge IT Consulting operates independently of any current or past employers and without vendor bias, ensuring all recommendations remain objective, transparent and in the client's best interests.
